

Improve Your SaaS Security Posture

Ensure the configuration of your SaaS ecosystem is secure and compliant. With Reco, you can improve your security coverage and lower your risk, while saving time and reducing costs.

Discover SaaS Security Posture

Gain instant visibility into the current security posture of your SaaS applications by setting baseline configurations. Reco continuously evaluates your security posture for gaps in near real-time.

Prepare for an IT Audit

Be prepared for an IT audit by tracking changes in configuration settings. No need to rely on inefficient manual checks or expensive assessments. Reco monitors for misconfigurations continuously.

Prevent Configuration Drifts

Assess posture across all SaaS application security controls continuously with hundreds of one-click checks that score alignment of your critical SaaS apps against recommended security configurations, and monitor for drifts.

Ensure Continuous Compliance

Maintain compliance by continuously checking your SaaS security posture against industry best practices and frameworks including SOC 2, ISO 27001, CIS, NIST CSF, NIST 800-53, PCI, HIPAA, and more.

Posture Management & Continuous Compliance

App Discovery & Governance

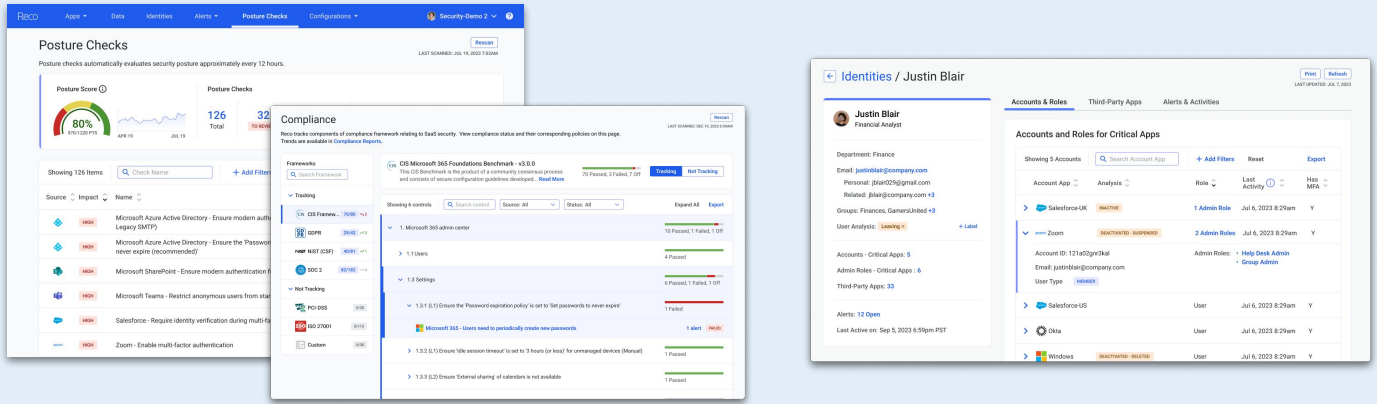

Identity & Access Governance

SaaS Detection & Response

Automate Misconfiguration Management

Identify configuration drift that can creep into SaaS apps over time and reintroduce risk. With Reco, you'll know when security controls are not working, and can take action with hundreds of one-click posture checks. Easily report to your executive team on posture scores and implement a program for continuous improvement.

Reco Continuously Monitors for Configuration Drifts

Near Real Time detection of drifts **100+** posture checks **10 FTE** hours saved/week **72%** lower security risk

Reco Supports These Business-Critical SaaS Applications and More

Organizations Worldwide Trust Reco to Discover & Resolve Misconfigurations

“Reco’s SSPM has strengthened our security approach in SaaS. The Reco posture dashboard provided a seamless experience, enabling us to clearly understand where our posture gaps are. This intuitive platform not only highlighted misconfigurations but also offered straightforward steps for resolution, saving us invaluable time in the process.”

Tomer Stenzler, Director of Cyber Security
