

Detect & Respond to Threats Quickly

Investigate risky behavior and stop malicious activity in your SaaS apps with prioritized alerts. Remediate directly within your existing SIEM or SOAR.

Manage Your Security Posture & Risk

Gain centralized visibility to effectively manage risk. Reco offers proactive monitoring, ensuring a secure environment for mitigation. Our detections cover all controls that can prevent the next breach.

Prioritize with Context-Based Alerts

Gain a comprehensive understanding of security incidents. Reco's context-based alerts utilize the power of our Identities Interaction Graph to alert on exposure. Your team can effectively prioritize and mitigate.

Leverage Visibility & Policy Enforcement

Reco provides complete oversight of your SaaS ecosystem. By enforcing security policies across the entire SaaS stack, our platform detects suspicious activities and potential threats, ensuring a secure environment.

Remediate in Your Existing SIEM or SOAR

Seamlessly integrate Reco with your existing SIEM or SOAM systems. Correlate and automate events, reducing overall risk automatically and eliminating manual intervention.

Posture Management & Continuous Compliance

SaaS Detection & Response

Mitigate Potential Threats, Early

Enable our 200+ dynamic, ready-to-use policies that address real-world cyber attack scenarios based on continually updated TTPs. Be alerted to exposure from internal/external threats such as ransomware, account takeover, insider threats, and significant changes in behavior. Remediate within the tools you trust such as your existing SIEM, SOAR, and ticketing.

Reco Continuously Monitors for Potential Data Exposure

99% reduction in false positives
20% of incidents go undetected for months
>100 days required to contain a breach
\$4.45 average cost of a data breach

Reco Supports These Business-Critical SaaS Applications and More

Organizations Worldwide Trust Reco to Mitigate Risk from SaaS-to-SaaS Integrations

“The drastic reduction in unclear alerts saved over 50% of our team's time, freeing them to focus on more important tasks. Reco’s AI-based solution provided the missing context we needed to understand what actions we needed to take quickly and accurately. The immediate impact on our team's productivity was undeniable.”

Tomer Stenzler, Director of Cybersecurity

“Reco's contextual alerts, automated workflows, and policy management provided immediate value to our organization, enhancing our ability to protect data, mitigate risks, and create a secure environment for both customers and employees.”

Robert Kugler, Head of Security & Compliance
