

# Identity-Centric SaaS Security

## Posture Management & Compliance

Ensure your configurations are compliant. Improve security coverage and lower risk, saving time & money.

## App Discovery & Governance

Manage SaaS-to-SaaS integration risk. Get full visibility into what's connected, users, and the level of access.

## Identity & Access Governance

Ensure the right access, and not more. Understand exposure from permissions that can lead to a breach.

## SaaS Detection & Response

Detect & quickly respond to SaaS threats using prioritized alerts. Remediate in your SIEM and SOAR.

## Fully Integrated in Minutes

Use our managed onboarding to connect Reco within minutes. Maintaining Reco requires only 10 hours/week.

## Organizations Worldwide Trust Reco to Improve Security Coverage & Lower Risk

6 Reco helped us reduce the number of false positives. Thanks to their context based security solution, we were able to filter out up to 99% of the false positives in our environment, enabling our security team to respond more effectively to real threats.

## Get the Context Needed to Prioritize Risk & Reduce Time Spent on Manual Work

Reco uses advanced analytics around persona, actions, interactions and relationships, and then alerts on exposure from misconfigurations, over-permission users, compromised accounts, and insider risk. This comprehensive picture is generated continuously using the Reco Identities Interaction Graph and empowers security teams to prioritize their most critical points of risk and lower their security risk.

## Reco Integrates with Existing Workflows Established in SIEM and SOAR Solutions

66 The main benefit of Reco is that it allows me to be much more efficient with my time. Instead of spending hours investigating and triaging alerts, Reco takes care of it for me by providing all the necessary context and information, along with workflows that help to reduce risk across my SaaS environment.

Robert Kugler

Head of Security & Compliance at **CRESTA**
